

Support Beacon *Relief*[™]

Disaster logistics for nonprofits.

LIVE — AVAILABLE NOW

FCG + FUZION CHICKASAW GROUP / IN PARTNERSHIP WITH RANCHER NAVY

WHAT IT IS

A secure, end-to-end logistics platform purpose-built for nonprofit disaster response. Support Beacon Relief connects nonprofits, haulers, donors, and volunteers to get supplies where they are needed after disaster — volunteer registration, NDA and waiver management, donation tracking, dispatch, live hauler routing, and DOT-integrated mapping, all in one place. Built on the SB217™ Support Beacon Platform, with a web portal for coordinators and a mobile app for the people in the field. Licensed to qualifying nonprofits by review. Designed and developed by shared resources from Fuzion Consulting Group and Fuzion Chickasaw Group, in partnership with Rancher Navy — the Texas nonprofit whose relief operations shaped it.

CORE CAPABILITIES

■ Volunteer Registration

Intake, roles, and contact records in one roster, so coordinators know who is available before the call goes out.

■ Donation Tracking

Every donated load recorded from offer through delivery, with the documentation donors, boards, and auditors ask for.

■ Live Hauler Routing

Drivers receive assignments instantly, log pickups, and update delivery locations in real time from the road.

■ Request & Delivery Visibility

Recipients submit requests and watch inbound deliveries. Donors track pickups live. Status notifications keep every party current.

■ NDA & Waiver Management

Agreements issued, signed, and tracked in the platform. Status is visible at dispatch, not filed in a box somewhere.

■ Dispatch

Match incoming requests to available supply and available haulers, and assign with the job details attached.

■ DOT-Integrated Mapping

Routing built on Department of Transportation road data, so plans reflect the conditions crews actually meet.

■ Job Records & Export

Completed jobs export as PDF or HTML with load details, trip miles, timestamps, and addresses — for recordkeeping and tax documentation.

HOW IT WORKS

Nonprofits coordinate. Donors supply.
Haulers move. Communities receive.

Four roles, one network, and a single record of every load from the offer to the drop-off. Coordinators work the web portal; drivers, donors, and recipients work the mobile app. Nothing has to be reconciled by phone call afterward.

Nonprofits COORDINATE	Donors SUPPLY	Haulers MOVE	Recipients REQUEST
Volunteers STAFF	Mobile App IOS + ANDROID	DOT Mapping INTEGRATED	SB217™ PLATFORM

ACCESS

Licensed by Review

Nonprofit disaster response organizations are licensed case by case. Fuzion sets the terms of each license, and has granted no-cost and reduced-cost licenses where the mission and the fit warrant it.

Web Portal & Mobile App

Coordinators run operations from the member portal. Drivers, donors, and recipients work the Support Beacon app — available on iOS, with Android available on request while Google Play approval is pending.

Built on SB217™

The same Support Beacon Platform behind our enterprise edition — so a nonprofit runs on infrastructure proven at commercial scale.

BUILT FOR

- Disaster Relief Nonprofits
- Faith-Based & Community Organizations
- Volunteer Fire & Rescue
- Agricultural & Ranch Relief
- Food & Supply Banks
- Regional Donation Hubs
- Independent Haulers & Carriers
- County & Tribal Emergency Response

OWNERSHIP & LICENSING

Support Beacon Relief™ is owned by Fuzion Companies, LLC and delivered by Fuzion Consulting Group and Fuzion Chickasaw Group™. Fuzion licensed it to Rancher Navy at no cost, a decision made for a founding nonprofit partner. Additional nonprofit disaster-response organizations may be licensed following review, on terms set by Fuzion in each case.

PROVEN IN THE FIELD

Support Beacon Relief has run in live disaster operations, including the Kerrville, Texas flood response — where Rancher Navy moved supply into ground trucks could not reach — and the Ranger Road fire response. Built by people who were on the ground for both.

BUILT BY

Support Beacon Relief™ was designed and developed by shared resources from Fuzion Consulting Group and Fuzion Chickasaw Group™, in partnership with Rancher Navy, and built on the SB217™ Support Beacon Platform — shaped by real disaster operations rather than assumptions about them.
