Support Beacon Relief™

Disaster-relief logistics for nonprofits.

PRODUCT BRIEF

FUZION CONSULTING GROUP + JOINT DELIVERY

WHAT IT IS

A disaster-relief logistics application for nonprofits and community-response organizations. Support Beacon Relief™ connects donors, volunteers, haulers, loads, and deliveries in one coordinated operating picture. Built for Rancher Navy after the Ranger Road Fire, it replaces disconnected spreadsheets and group texts with structured workflows, live visibility, mobile access, and an audit-ready record of the work.

CORE CAPABILITIES

- **Donor & Sponsor Management**
  Track sponsors, recurring givers, one-time donors, commitments, and acknowledgments.
- **DOT-Aware Hauler Dispatch**
  Coordinate drivers and carriers with operating details needed before a load moves.
- **Event & Drive Management**
  Run hay drives, supply collections, fundraisers, and distribution events with repeatable workflows.
- **Delivery & Distribution Records**
  Document every dispatch, handoff, delivery, and recipient-facing milestone.
- **Volunteer Coordination**
  Organize volunteers, assignments, schedules, communications, and service activity.
- **Live Load Tracking**
  See trucks, loads, origins, destinations, and delivery progress in real time.
- **Mobile Field Access**
  Give dispatchers, haulers, volunteers, and field teams access from the devices they already carry.
- **Audit-Grade Reporting**
  Preserve a transparent activity trail for nonprofit governance, donor confidence, and after-action review.

WHERE IT COMES FROM

Built in six weeks because the work could not wait.

Support Beacon Relief™ was born after Fuzion's team drove into the Ranger Road Fire response and met Rancher Navy coordinating an expanding relief operation through spreadsheets and messages. The team volunteered to build a better system. The result is a platform shaped by the people doing the work.

- Agricultural Disaster Relief
- Nonprofit Response Organizations
- Tribal Nations & Governments
- Volunteer-Led Relief Networks
- Donated-Goods Distribution
- Community & Faith-Based Response
- Regional Hauler Coordination
- Emergency Supply Drives
- Mining

OPERATIONAL USE NOTICE

Support Beacon Relief™ supports nonprofit logistics and coordination. It does not replace emergency management, agency dispatch, carrier safety obligations, or the judgment of qualified responders and transportation professionals. Participating organizations remain responsible for their operational data, driver qualifications, regulatory compliance, and field decisions.

BUILT BY

Support Beacon Relief™ is delivered jointly by Fuzion Consulting Group™ and Fuzion Chickasaw Group™, built within the SB217Platform™ Support Beacon platform suite.
